

Minutes of the meeting

Sprint Number: 1

Call to order: A meeting of Group 2 was held at D-lab on 4/05/2018

Attendees:

- Jesal Chana
- Yusuf Ally
- Shahil Sunder

Members not in attendance:

All members were present

Reports:

The initial adding within the list was done as the Lab 3 from the course demonstrated. This however created a problem for adding quantities and categories to the list. The data structure must be changed to allow all of the above data to be stored.

Shahil had limited access to the internet and the Dlab computers did not allow for modules to be installed. It was decided to keep the website offline for as long as possible to try and help the developer to contribute.

Due to many deadlines the database could not be implemented. Rather it was decided unanimously that the JSON objects will be stored within a JSON bin.

Initially ejs was used for the frontend. It was decided at this meeting to keep to the lab structure so that if any issues did arise the lab demonstrators would be able to assist.

Unfinished Business:

The initial add to list functionality needs to be changed in terms of the data structure used.

Various bug fixes need to be implemented as part of work not completed during this sprint.

It was found that the group could not test their features during this sprint due to commitments to other courses.

New Business:

Sprint 2 would need to be delayed as Yusuf and Jesal both had major deadlines within the week during this sprint.

It was decided that Yusuf would work on creating the list to allow for JSON inputs to be added.

Announcements:

Sprint 2 was delayed by two days.

The next meeting would need to occur using some online tool such as skype as not all members will be at the university.
